Waddi Wind Farm

COMMUNITY NEWSLETTER

Waddi Wind Farm will deliver 108MW of renewable energy, enough to power 68,000 homes. Construction of the project is underway, bringing employment and broader benefits to the region.

Since our newsletter in May 2026, our team has made major progress on-site.

We've also been busy in the community, hosting events, welcoming guests to site, and sponsoring community initiatives through our construction benefit sharing program.

In this newsletter, you will find updates on:

- Construction
- Community engagement and benefit sharing
- Community Reference Group
- Next steps

PROJECT SNAPSHOT

Location: 15km north-west of Dandaragan

Number of turbines: 18

Blade tip height: 206m

Sign up to stay informed during construction

You can opt-in by scanning the QR code or visiting the project webpage to complete the online form. Alternatively, email or call us and we'll sign you up.

Construction update

Our crews have been working hard since February 2026 and have made significant progress on civil works at Waddi Wind Farm. We thank our landholders, neighbours and the community for their patience during construction. Check out our highlights below.

Our progress

- All 18 turbine foundations excavated and concrete poured
- 26km of internal access tracks constructed
- 3 new meteorological masts installed to measure wind conditions
- A peak of 75 workers and 35 vehicles on-site daily
- Started works to seal 8km of Mullering Road between the Brand Highway and an area east of the wind farm entrance
- Western Power started works on 7.5km of overhead transmission line to connect the project to the existing grid

13,860
tonnes of concrete poured, made in our on-site batch plant

1,890
tonnes of steel reinforcement installed in turbine foundations

Community engagement and benefit sharing

Figure 4: Waddi Community Reference Group on a site tour

Figure 5: Dandaragan Primary students thank Tilt for a sponsorship

We've been busy in the community this year, working with locals to shape how we share information and find projects to fund as part of construction benefit sharing.

We're proud to have funded more than 8 community initiatives this year, including energy upgrades at Dandaragan Community Resource Centre, new water tanks at Dandaragan Primary and many smaller sponsorships that help to build resilience in the community. We look forward to continuing to work with Dandaragan locals and Yued Aboriginal Corporation as construction progresses into 2027.

Community Reference Group

Since October 2025, we have held five meetings with our Community Reference Group, where we share information about construction, project news and even went on a site tour!

Meeting minutes and presentations are available on our website via the QR code or visiting **www.tiltrenewables.com/waddi**

We have three more meetings planned for 2027, if you're interested in joining, please email Tim at **waddiwindfarm@tiltrenewables.com**

Minutes

Next steps for the project

Late 2026

- Mullering Road works complete
- Civil construction works complete
- Vestas mobilise on-site to start preparing for turbine works

Early 2027

- Turbine components and blades start arriving on-site
- Construction of turbines starts
- First turbine complete

Mid to late 2027

- Last turbine complete
- Construction of operations and maintenance facility
- Testing and commissioning starts
