3. STAKEHOLDER ENGAGEMENT UPDATE

4. BENEFIT SHARING

5. QUESTIONS/DISCUSSION

COOPERS GAP WIND FARM TRANSITION TO TILT RENEWABLES

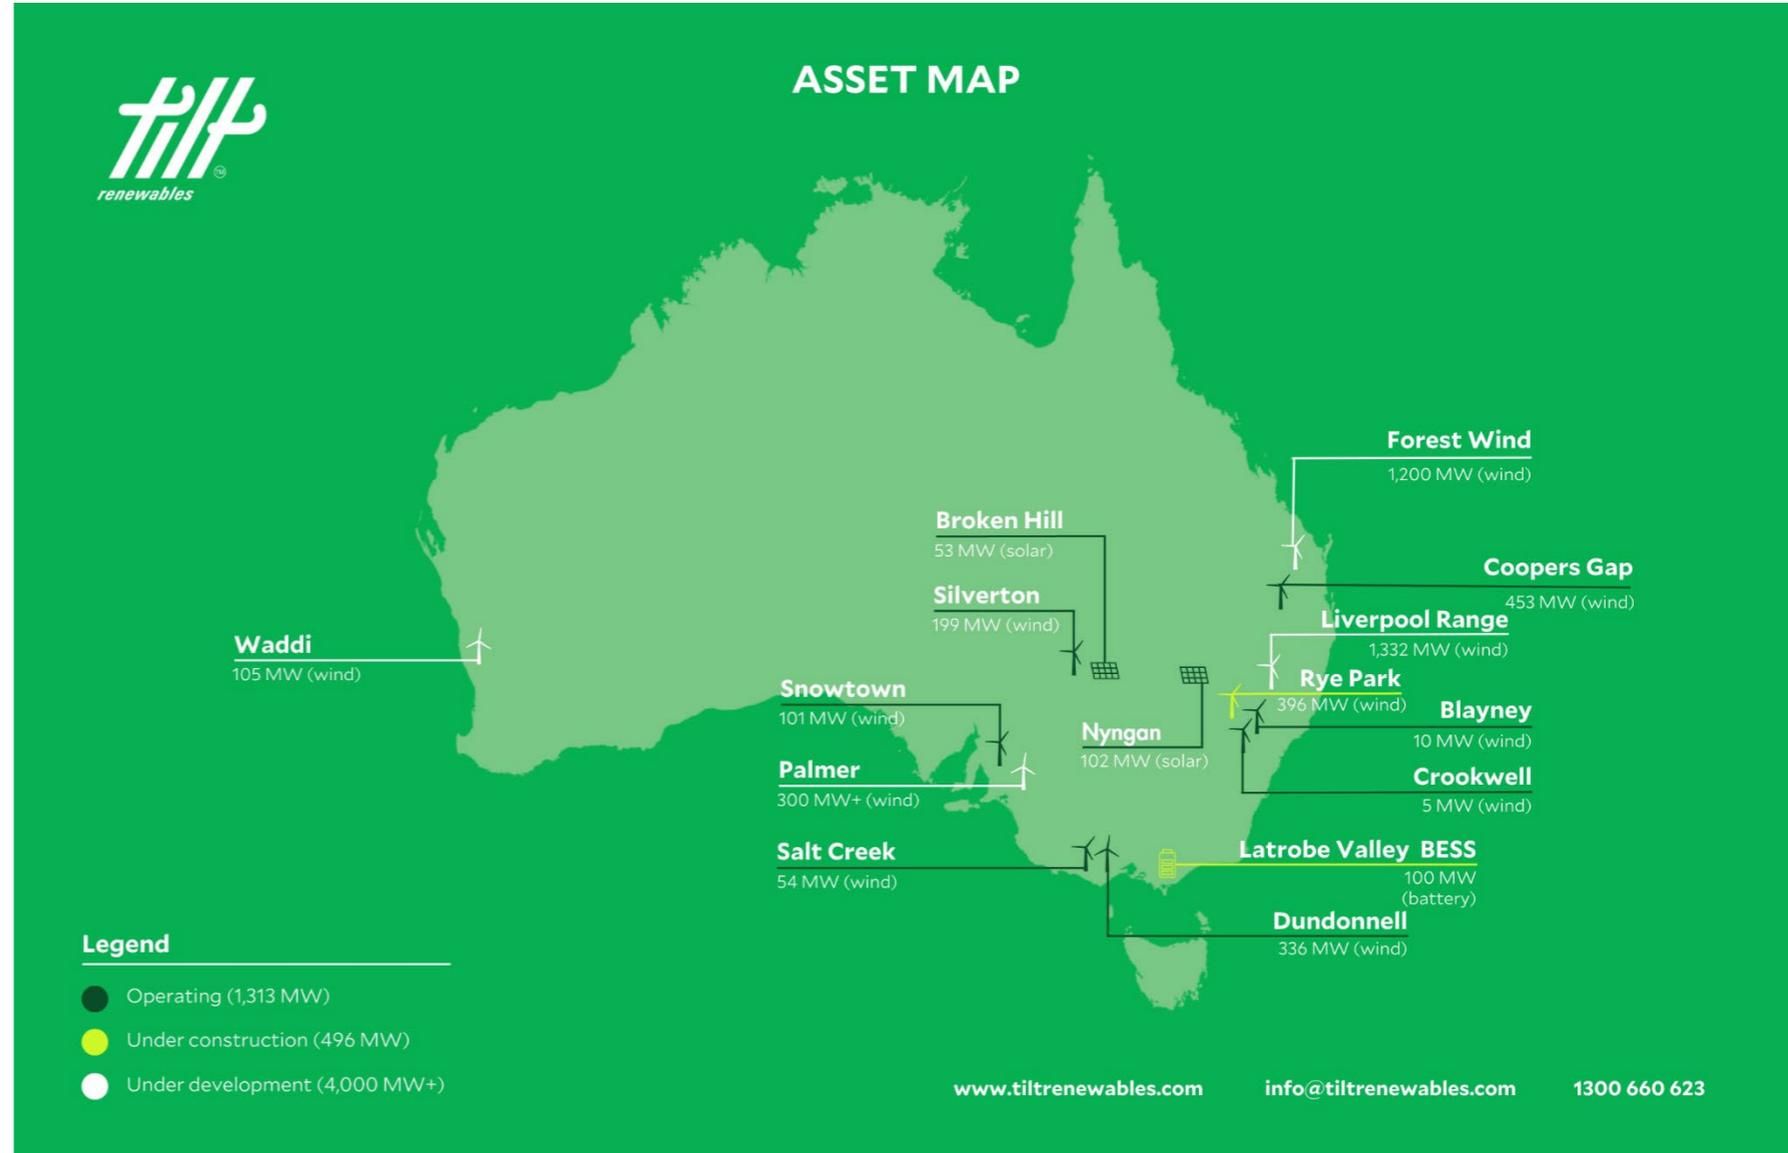

Transition from AGL to Tilt Renewables

Tilt Renewables is assuming direct operation of Coopers Gap Wind Farm, starting with landowner and community stakeholder relations.

AGL will continue to purchase all the power from Coopers Gap Wind Farm.

The transfer started in October 2023 with community engagement. This includes coordinating the Community Consultative Committee, and delivery and administration of the Community Fund.

Handover of the balance of operations is scheduled for completion by mid 2024.

What's been happening on site

- Currently 11 WTG down with 112 wind turbines operational. A few gearboxes and transformers require replacement. Waiting on Niagara road culvert upgrades to complete these works.
- Discussions being held with council to upgrade culverts along Niagara road. PLQ are constructing an overhead line network to supply Wambo Windfarm (not directly Coopers Gap related, more of an infrastructure upgrade)
- No health and safety issues to report in this period
- both main Transformers on site at CGWF had their 5 yearly major maintenance undertaken during October (the public may have noticed a few WTGs not spinning for a few weeks in Oct)
- Annual maintenance for each individual WTG is on schedule to finish mid-December.

Performance

- Last 12 months (total generation for October 2022 – October 2023): 1489.18 GWh
- Equivalent number of households powered = 207,000
- Saved 1,191,000 tonnes greenhouse gas emissions from entering the atmosphere

Environmental Compliance

- In August, an independent internal environmental audit was conducted. There were no major non-conformances found during the audit.
- GE continue to manage the site in accordance with the environmental management plans.

Acoustic Compliance

- The first round of acoustic compliance testing has been conducted.
- Results are being assessed by independent acoustic consultants, who have advised the wind farm has demonstrated compliance.
- As required under the Development Approval, a second round of acoustic monitoring will be undertaken.
- Compliance will be confirmed when both rounds of monitoring are complete, results assessed, and submitted to the responsible authority.

STAKEHOLDER ENGAGEMENT AND BENEFIT SHARING

Community Fund

- \$100,000 per year (previously 70/30 split)
- Tilt Renewables will maintain the fund at \$100,000

Telecommunications tower

- Planning still underway
- Expect an update in the coming year re timing

Successful recipients

- Bell Art Group - Major Art Prizes \$3,000
- Bell Bunya Community Centre - Construction of fence around memorial rose garden \$967
- Bell Race Club - Equipment for country race day \$3,000
- Bell K-10 State School - Community garden for students \$5,130
- Bell Bunya Community Centre - Intimus Paper Shredder \$2,596
- Regional Arts Council Dalby Inc - Annual Jazz in the Gardens Event \$2,400
- Qld Country Women's Association Kumbia Branch - Celebration of 100 years \$6,000
- Cooranga North Recreation Reserve Inc - Roller shutters for canteen \$4,068
