

Waddi Wind Farm

CONSTRUCTION UPDATE

Welcome to the first construction update for Waddi Wind Farm.

Waddi Wind Farm will deliver 108MW of renewable energy, enough to power 68,000 homes. Construction of the project is now underway, bringing employment and broader benefits to the region.

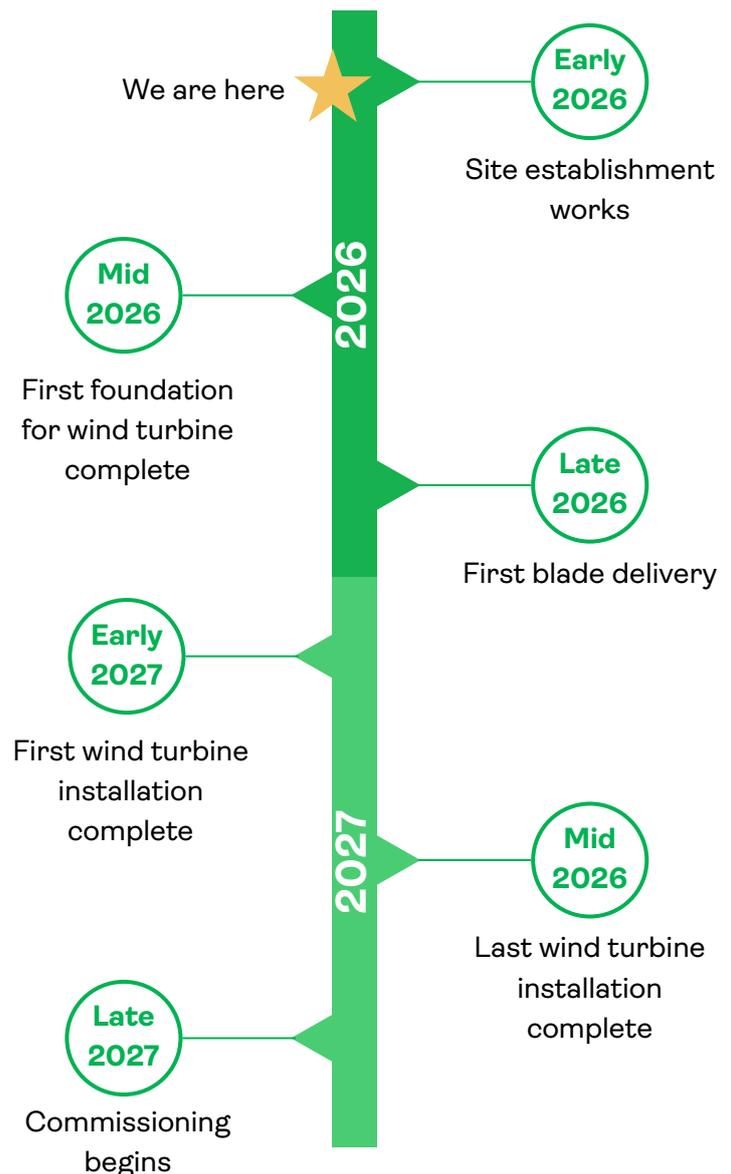

What's happening on site?

Our team has mobilised on site for early works, which includes construction of internal roads and a site compound. Western Power will also be completing enabling works for the transmission line that will connect the project to the existing grid. The work will largely be contained to the site, however you may see an increase in local traffic during this time.

We understand construction activity can cause disruptions and we appreciate your patience. Please view the map on the next page to see how we are accessing the site.

For any questions or feedback please contact the project team via **1800 WE TILT** (938 458) or WaddiWindFarm@tiltrenewables.com
