

Waddi Wind Farm

CONSTRUCTION UPDATE

Waddi Wind Farm will deliver 108 MW of renewable energy, enough to power 68,000 homes. Construction of the project is now underway, bringing employment and broader benefits to the region.

Works are progressing well at Waddi Wind Farm, with construction highlights including:

- 15 of 18 anchor cages have been installed in turbine foundations
- 13 of 18 turbine foundations have had concrete poured
- 4 of 18 turbine foundations have been backfilled
- 2 of 3 new meteorological masts have been installed
- Western Power pole preparation works have started.

Upcoming impacts

Works on Mullering Road are expected to start in October 2026, please subscribe for SMS updates using the QR code below. **Please see map on next page for detour route.**

Locals may notice increased lighting at night during concrete pours.

These generally take place on Wednesday and Friday nights, and lighting should not impact local residences. Please contact our team if you have any concerns.

Sign up to SMS updates

You can opt-in by scanning the QR code or visiting the project webpage to complete the online form. Alternatively, email or call us and we'll sign you up.
