

October 2026 #10

Waddi Wind Farm

CONSTRUCTION UPDATE

Waddi Wind Farm will deliver 108 MW of renewable energy, enough to power 68,000 homes. Construction of the project is now underway, bringing employment and broader benefits to the region.

We are pleased to share that Waddi Wind Farm has reached a significant milestone with all 18 turbine foundations being poured!

Highlights from the foundation work include:

- **13,860** cubic metres of concrete poured, made on-site in our batch plant
- **1,800** truck loads of concrete moved
- **1,890** tonnes of steel reinforcement installed
- Around **180** hours worked during concrete pours.

We thank our landholders, neighbours and the community for their patience during construction.

Other construction highlights:

- 6 of 18 foundations have been backfilled
- Work has started on Western Power's 132kV transmission line

Upcoming impacts

Works are taking place on Mullering Road, and at the Brand Highway intersection, until mid-November 2026.

The road will remain open with traffic management in place. Please follow all signage and take care when travelling through the area.
